

FIG. 1

100

FIG. 2    200

FIG. 3A is a block diagram of a network topology. The network includes an Ingress Station (102) and an Egress Station (106). The Ingress Station (102) is connected to four intermediate nodes: I1 (202), I2 (204), I3 (206), and I4 (208). The Egress Station (106) is also connected to these four intermediate nodes. The intermediate nodes are arranged in two rows: I1 and I2 in the top row, and I3 and I4 in the bottom row. I1 and I2 are connected to each other, and I3 and I4 are connected to each other. The connections between the Ingress Station (102) and the intermediate nodes are labeled 302, 304, 310, and 312. The connections between the intermediate nodes and the Egress Station (106) are labeled 306 and 308.
